Error codes and solutions (version 3.7)

Every alert, warning and message in the studio carries a code that starts with FS-. This list is generated from the same table the software uses.

FS-E101 - Trial balance does not balance (Error)

- Meaning: The total of debit balances differs from the total of credit balances.
- Usual cause: A ledger was left out, an amount was keyed on the wrong side, or an import was partial.
- Solution: Open Trial balance, read the difference at the bottom, and look for the ledger or sign that explains it. Do not post a balancing figure.
- Screen: Trial balance

FS-E102 - Balance sheet does not balance (Error)

- Meaning: Total assets differ from total equity and liabilities.
- Usual cause: Usually a trial balance that is out of balance, an unclassified ledger, or a ledger placed on the wrong statement line.
- Solution: Clear FS-E101 and FS-E103 first. Then check ledgers whose statement line is on the wrong side. The difference is shown, never absorbed.
- Screen: Balance sheet

FS-E103 - Ledger without a statement line (Error)

- Meaning: A ledger with a balance is not mapped to any line of the financial statements.
- Usual cause: The ledger was imported or created without a classification.
- Solution: Open Chart of accounts and choose the statement line for each listed ledger.
- Screen: Chart of accounts

FS-E104 - Opening balance differs from the previous year closing (Warning)

- Meaning: An opening balance is not equal to the adjusted closing balance of the previous year.
- Usual cause: The opening figure was keyed by hand, the previous year changed after carry-forward, or a journal was posted in the previous year later.

- Solution: Open Trial balance, review the listed ledgers, and choose Carry forward again. If the change is intended (for example an audit adjustment), record the reason and lock the opening.
- Screen: Trial balance

FS-E105 - Journals not posted or not balanced (Warning)

- Meaning: Draft journals exist, or a journal has unequal debits and credits.
- Usual cause: A journal was saved as a draft and not finalised.
- Solution: Open Journals, correct the amounts so that debit equals credit, and post it, or delete the draft.
- Screen: Journals

FS-E106 - No previous year available (Error)

- Meaning: Opening balances cannot be carried forward because no earlier financial year exists for this entity.
- Usual cause: The entity has only one financial year in the system.
- Solution: Add the earlier year, or enter the opening balances by hand and lock them.
- Screen: Trial balance

FS-E107 - Profit or loss has no equity ledger to receive it (Error)

- Meaning: The previous year result cannot be moved to an opening reserve because the entity has no equity ledger.
- Usual cause: The chart of accounts has no ledger of type Equity.
- Solution: Add a reserves and surplus (company) or capital account (firm or proprietor) ledger, then carry forward again.
- Screen: Chart of accounts

FS-E201 - Depreciation in ledgers differs from the schedule (Warning)

- Meaning: The depreciation expense in the trial balance and journals is not equal to the fixed-asset schedule.
- Usual cause: The schedule was changed after the journal was posted, or the ledger was keyed by hand.
- Solution: Open Depreciation and post the depreciation journal again. The system posts only the difference.
- Screen: Depreciation

FS-E202 - Asset life or residual value outside Schedule II (Warning)

- Meaning: The life is shorter than the Schedule II life, or the residual value is above 5% of cost.
- Usual cause: A different life or residual value was chosen without a recorded technical reason.
- Solution: Record the technical justification in the asset note, or use the Schedule II life. The Act requires disclosure of such a difference.
- Screen: Fixed assets

FS-E203 - Income-tax block problem (Warning)

- Meaning: A tax block has a negative written down value, a missing rate, or ceased with assets remaining.
- Usual cause: A sale exceeded the block value, or the block rate is missing.
- Solution: Open Income-tax depreciation, check the sale proceeds and block rates. A negative value is treated as short-term capital gain.
- Screen: Income-tax depreciation

FS-E204 - Assets used for fewer than 180 days (Info)

- Meaning: Assets added in the year were used for fewer than 180 days and get the half rate for income tax.
- Usual cause: This is the rule, not an error. It is flagged so that it is not missed.
- Solution: Check the date the asset was first put to use. The tax use date can differ from the capitalisation date.
- Screen: Income-tax depreciation

FS-E301 - Current tax in books differs from computation (Warning)

- Meaning: The tax expense or provision in the ledgers is not equal to the computed current tax.
- Usual cause: The computation was changed after the provision was posted.
- Solution: Open Taxes and post the current tax journal again. The system posts only the difference.
- Screen: Taxes

FS-E302 - Deferred tax in books differs from computation (Warning)

- Meaning: The deferred tax asset or liability in the ledgers is not equal to the computed balance.
- Usual cause: Depreciation, temporary differences, or the tax rate changed after deferred tax was posted.
- Solution: Open Taxes, review the deferred tax schedule and post the deferred tax journal. The system posts only the difference.
- Screen: Taxes

FS-E303 - Minimum alternate tax applies (Info)

- Meaning: Tax on book profit is higher than tax on taxable income.
- Usual cause: Large deductions or depreciation reduced taxable income below book profit.
- Solution: Review the computation. For tax years up to 2025-26 a MAT credit may be carried forward. From 2026-27 MAT paid is final.
- Screen: Taxes

FS-E304 - Tax loss about to lapse (Warning)

- Meaning: A brought-forward business loss lapses within the next 12 months or has already lapsed.
- Usual cause: Business losses can be carried forward for 8 years only; unabsorbed depreciation has no limit.
- Solution: Plan the use of the loss and check the deferred tax asset recognised on it.
- Screen: Taxes

FS-E305 - Deferred tax asset on losses not recognised (Info)

- Meaning: Tax losses exist but no deferred tax asset is recognised on them because evidence of future taxable profit is not recorded.
- Usual cause: The evidence box in the deferred tax screen is not ticked. AS 22 needs virtual certainty; Ind AS 12 needs probable future taxable profit.
- Solution: If you have convincing evidence (orders, profit forecast, tax planning), record it in your working papers and tick the box. Otherwise no action is needed; the loss is disclosed.
- Screen: Taxes

FS-E401 - Cash flow statement does not reconcile (Error)

- Meaning: Cash flow movement differs from the movement in cash and cash equivalents.
- Usual cause: A ledger is classified to the wrong activity or Unclassified.
- Solution: Open Cash flow, read the reconciliation, and classify the listed ledgers.
- Screen: Cash flow

FS-E402 - Equity movement differs from the balance sheet (Warning)

- Meaning: The statement of changes in equity does not agree to the balance sheet.
- Usual cause: A reserve ledger is mapped to a non-equity line.
- Solution: Open Statement of changes in equity and check the mapped ledgers.
- Screen: Changes in equity

FS-E403 - Previous year column not shown (Info)

- Meaning: The report shows only the current year although an earlier financial year exists.
- Usual cause: The earlier year has no trial balance figures, or Show previous year is switched off.
- Solution: Enter or import the previous year trial balance, or tick Show previous year on the statement screen. In the first year of an entity only the current year is shown, as intended.
- Screen: Balance sheet

FS-E501 - Law rule not verified (Warning)

- Meaning: A statute or notified rule that applies to this period is not marked verified or checked against an official source.
- Usual cause: The rule was seeded or imported and has not been reviewed.
- Solution: Open Rules library, compare with the source shown, and mark the rule verified with your name and date.
- Screen: Rules library

FS-E601 - Ratio changed by more than 25% (Warning)

- Meaning: A required ratio moved by more than 25% against the previous year.
- Usual cause: Schedule III requires an explanation for such a change.
- Solution: Open Ratios and record the reason in the explanation box next to the ratio.

- Screen: Ratios

FS-E602 - Schedule III disclosure not answered (Info)

- Meaning: A required additional regulatory disclosure has no answer.
- Usual cause: The disclosure checklist is not complete.
- Solution: Open Additional disclosures and answer each item. Choose Not applicable where it is so.
- Screen: Additional disclosures

FS-E701 - Consolidation issue (Error)

- Meaning: The consolidation shows a difference or cannot be completed.
- Usual cause: Members are missing, ownership is outside 0 to 100%, or an elimination does not balance.
- Solution: Open Consolidation and read the issues listed under the group.
- Screen: Consolidation

FS-E803 - No authorised signatory set (Info)

- Meaning: Reports will print an empty signature block.
- Usual cause: No signatory has been entered for this entity.
- Solution: Open Report Settings and add the name and designation of each authorised signatory, the place and the date.
- Screen: Report settings

FS-E804 - Company logo could not be added to a PDF (Warning)

- Meaning: The PDF was created without your company logo.
- Usual cause: The stored logo image could not be decoded by the browser.
- Solution: Upload the logo again in Report Settings as a PNG or JPEG file, then create the PDF again.
- Screen: Report settings

FS-E805 - Logo file could not be read (Warning)

- Meaning: The logo you chose was not saved.
- Usual cause: The file is not a PNG or JPEG image, or it is damaged.
- Solution: Choose a PNG or JPEG file. Very large images are reduced automatically.
- Screen: Report settings

FS-E801 - Backup is old (Warning)

- Meaning: The data has not been backed up for the number of days set in preferences.
- Usual cause: The browser is the only copy of the data.
- Solution: Use Backup now, or save to a file on your computer.
- Screen: Home

FS-E808 - Feedback form cannot be opened (Warning)

- Meaning: The feedback form did not open.
- Usual cause: The device is offline.
- Solution: Connect to the internet and select the feedback link again.
- Screen: Footer

FS-E806 - Backup file refused (Error)

- Meaning: The backup file was not loaded.
- Usual cause: The file is larger than 100 MB, is not from this software, or does not have the expected structure.
- Solution: Use a backup created by this software with Backup now. Do not edit it by hand.
- Screen: Backup and storage

FS-E807 - Import file too large (Warning)

- Meaning: The file chosen for import was not read.
- Usual cause: The file is larger than 20 MB.
- Solution: Split the file into smaller parts and import them one at a time.
- Screen: Trial balance

FS-E802 - Data file problem (Error)

- Meaning: A backup or save file could not be read.
- Usual cause: The file is damaged, not from this software, or from a newer version.
- Solution: Use an earlier backup. Do not edit the file by hand.
- Screen: Home

FS-E108 - Business activity not selected (Warning)

- Meaning: The entity has no business activity selected, so the studio cannot decide whether a Trading Account is needed.

- Usual cause: The entity was created before version 3.4, or the activity was left blank.
- Solution: Open Entities, choose Edit, tick the activities of the business (for example Trading) and save.
- Screen: Entities

FS-E109 - Current year statements are not ready (Warning)

- Meaning: Provisional, estimated or projected accounts were opened before the current year statements are complete.
- Usual cause: The trial balance is out of balance, the balance sheet differs, or ledgers are not mapped.
- Solution: Finish the trial balance and statements first: clear FS-E101, FS-E102 and FS-E103. The derived accounts then follow the current year figures.
- Screen: Trial balance

FS-E404 - Closing stock not recorded (Warning)

- Meaning: The Trading Account shows no closing stock although there is opening stock or purchases, or closing stock equals opening stock.
- Usual cause: Closing stock is not in the trial balance and no stock journal has been posted.
- Solution: Open Trading and P&L Account, enter the closing stock value and choose Post closing stock journal. If stock really did not change, ignore this alert.
- Screen: Trading and P&L Account

FS-E405 - Trading and P&L result differs from the Profit and Loss statement (Error)

- Meaning: The profit shown by the Trading and Profit and Loss Account is not equal to the profit in the Profit and Loss statement.
- Usual cause: A ledger is mapped to a line that the Trading Account does not read, or a direct expense is mapped to Employee benefit or Other expenses incorrectly.
- Solution: Open Chart of accounts, check the statement line of the ledgers named in the difference, then reopen the Trading Account. The difference is shown, never absorbed.
- Screen: Trading and P&L Account

FS-E809 - Data could not be saved (Error)

- Meaning: The browser refused to store the data, so the last changes are not saved.

- Usual cause: Browser storage is blocked (private window, storage full, or site data switched off).
- Solution: Press Save again after freeing space or leaving the private window. Meanwhile use Backup and Storage, Download backup, so that nothing is lost.
- Screen: Backup and Storage

FS-E810 - Saved in browser storage only (Info)

- Meaning: Data is saved in this browser. No save file is connected.
- Usual cause: No save location has been chosen.
- Solution: Open Backup and Storage and choose a save file (Chrome or Edge), or download a backup regularly.
- Screen: Backup and Storage

FS-E406 - Partners' accounts differ from the balance sheet capital (Warning)

- Meaning: The closing balances of the partners' capital accounts (with any reserve transferred) do not add up to the equity in the balance sheet.
- Usual cause: Opening capital, capital introduced, drawings, or interest and remuneration were entered differently from the ledgers; or reserves in the ledgers are not part of the partners' accounts.
- Solution: Open Profit and Loss Appropriation, Partners' accounts. Compare the total with the balance sheet equity, correct the opening capital, additions and drawings, or note the reserves held outside the partners' accounts.
- Screen: Profit and Loss Appropriation

FS-E407 - Profit sharing ratio is not 100 percent (Error)

- Meaning: The profit sharing percentages of the partners do not add up to 100, or no partner has been entered, so the profit cannot be shared.
- Usual cause: A partner was added or removed without changing the percentages.
- Solution: Open Profit and Loss Appropriation and correct the profit share of each partner so the total is 100.
- Screen: Profit and Loss Appropriation

FS-E408 - Interest or remuneration to partners may be counted twice (Warning)

- Meaning: A ledger for interest on capital or partners' remuneration already has a balance in the Profit and Loss, and the Appropriation Account also charges interest or remuneration.

- Usual cause: The books charge these items as expenses, and they were entered again in the Appropriation Account.
- Solution: Use one method. Either leave the amounts in the Appropriation Account at zero, or move the ledger balances out of the Profit and Loss.
- Screen: Profit and Loss Appropriation

FS-E409 - Appropriation exceeds the indicative Section 40(b) limit (Info)

- Meaning: Interest on capital above 12 percent a year, remuneration above the indicative ceiling on book profit, or remuneration to a partner not marked as working, may be disallowed in the tax computation.
- Usual cause: Rates or amounts in the Appropriation Account are higher than the limits, or the partner is not working.
- Solution: Check the partnership deed and the tax computation. The Appropriation Account follows the deed; the limits only affect tax. Adjust the add-back in the Taxes screen if needed.
- Screen: Profit and Loss Appropriation

FS-E410 - Partners not set up for the Appropriation Account (Warning)

- Meaning: The entity is a partnership firm or LLP but no partners have been entered, so profit cannot be appropriated to the partners.
- Usual cause: Partners are entered in the Appropriation screen, not at entity creation.
- Solution: Open Profit and Loss Appropriation and add the partners with their profit share.
- Screen: Profit and Loss Appropriation

FS-E811 - T-form selected for a statement that has a prescribed vertical format (Info)

- Meaning: A company has chosen the T-form for the Balance Sheet or Profit and Loss, but Schedule III of the Companies Act prescribes the vertical form for statutory financial statements.
- Usual cause: The format option was changed to T-form.
- Solution: Use the T-form only for internal or management use. Select the vertical form for the statutory financial statements.
- Screen: Balance sheet

FS-E611 - Voucher debits and credits differ (Error)

- Meaning: The debit total of a journal voucher is not equal to its credit total, so it cannot be posted.
- Usual cause: An amount was keyed on the wrong side or a line is missing.
- Solution: Correct the amounts until the difference shows zero. Do not post a balancing figure.
- Screen: Voucher Entry

FS-E612 - Voucher date outside the financial year (Error)

- Meaning: The voucher date is blank or falls outside the selected financial year.
- Usual cause: A date from another year was entered, or the wrong financial year is selected.
- Solution: Enter a date between the start and end of the selected year, or switch to the right financial year.
- Screen: Voucher Entry

FS-E613 - Voucher is incomplete (Error)

- Meaning: A voucher has no ledger, no amount, an invalid amount, the same ledger on both sides, or a ledger of another entity.
- Usual cause: A required field was left blank.
- Solution: Complete the highlighted lines and save again.
- Screen: Voucher Entry

FS-E614 - Financial year is closed (Error)

- Meaning: Vouchers cannot be added, changed or cancelled in a closed financial year.
- Usual cause: The year was marked Closed.
- Solution: Reopen the year in Financial Years if a change is really needed, and note the reason.
- Screen: Voucher Entry

FS-E615 - Trial balance figures replaced after vouchers were posted (Warning)

- Meaning: Vouchers exist for this year, but the trial balance figures of a ledger were edited or imported, so the ledger account may not show every figure.
- Usual cause: A trial balance import or edit was made after vouchers were posted.
- Solution: Open Ledger Account and check the line "Movements entered directly in the Trial Balance". Import trial balance files before entering

vouchers.
- Screen: Ledger Account

FS-E812 - Audit log checksum does not agree (Error)

- Meaning: A check of the audit log found an entry that was changed, removed or inserted after it was recorded.
- Usual cause: The backup file was edited outside the studio, or the log was damaged.
- Solution: Restore the last good backup. If the change was authorised, record the reason and continue. The check is a safeguard, not a legal guarantee.
- Screen: Audit Log

FS-E711 - Schedule figure changed (Warning)

- Meaning: A figure in a schedule (break-up) was changed by hand, so the schedule no longer agrees with the ledgers and the statement.
- Usual cause: A user typed a different amount in the Schedules screen.
- Solution: Check why the figure was changed. Correct the ledger or journal if the books are wrong, or press Reset to return to the ledger figure. The statement is always built from the ledgers; only the schedule is changed.
- Screen: Schedules

FS-E712 - Tally file could not be read (Error)

- Meaning: The file chosen for Tally import is not a Tally XML export, or it is empty.
- Usual cause: The wrong file was chosen, or the Tally export was in another format.
- Solution: Export Masters or the Day Book from Tally in XML (Data Interchange) format and choose that file. For a trial balance in CSV use Trial Balance, Import.
- Screen: Tally Import

FS-E713 - Tally ledgers need review (Warning)

- Meaning: Ledgers created from Tally were classified from the Tally group name, and some could not be classified.
- Usual cause: Tally groups are not the same as statement lines; user-made groups have no fixed meaning.
- Solution: Open Chart of Accounts and check the mapping of the new ledgers, especially those with no statement line.
- Screen: Chart of accounts

FS-E714 - Some Tally vouchers were not imported (Warning)

- Meaning: Vouchers were skipped because they are outside the financial year, unbalanced, cancelled or optional, use a ledger that is not in the chart of accounts, or were already imported.
- Usual cause: The Tally export covers a longer period, or ledgers were not created.
- Solution: Read the list in the import result. Choose "Create missing ledgers" and import again for ledger-related skips. Duplicates are safe to ignore.
- Screen: Tally Import

FS-E715 - Tally opening balances do not balance (Warning)

- Meaning: The opening balances read from Tally have different debit and credit totals.
- Usual cause: The export did not include every ledger, the sign convention is reversed, or the Profit and Loss opening balance is missing.
- Solution: Try the other sign convention in the import options, export Masters with all ledgers, and check that "Profit & Loss A/c" is included.
- Screen: Tally Import

FS-E716 - Manufacturing stock does not agree to the Trading Account (Warning)

- Meaning: Opening or closing stock by type (raw materials, work-in-progress, finished goods) does not add up to the stock used in the Trading Account.
- Usual cause: Stock ledgers are not tagged, or the stock ledgers have opening balances that differ from the previous year's closing, or the journal that sets the closing stock was posted to one ledger only.
- Solution: Open Manufacturing Account, set the stock type of every Inventories ledger, and check the opening balances.
- Screen: Manufacturing Account
