User Guide

EPFO Member Registration Bulk File Generator · Version 1.0.1 · 13 November 2026 · Techmin HR Solutions

1. What this tool does

It prepares the EPFO new-member registration data and generates the bulk TXT file. It does not submit registrations to EPFO and does not approve member KYC.

2. Adding members

Open **Add Member** and complete sections A to F: previous employment/UAN, personal details, employment details, international worker, differently abled and KYC. Fields marked * are required on the EPFO form. Press **Save member**. A record with errors can be saved and fixed later.

3. Importing

Excel Import reads .xlsx, .xls and .csv, recognises the column headings, lets you change the mapping, shows a preview and lists errors. **JSON Import** reads the template structure. **TXT Import** reads an EPFO 30-field file with #~#; the header line is skipped and lines with the wrong number of fields are rejected. Columns or fields that are not recognised are listed, never dropped silently.

4. Checking

The **Validation Centre** lists every error (red) and warning (amber). Press Open to go to the member and field.

5. Generating the file

Open **Generate EPFO TXT**, choose the records, press **Generate TXT preview** and then **Download TXT**. The file is named EPFO_Member_Registration_Bulk_YYYYMMDD.txt, UTF-8, with the 30 field names on the first line and then one line per member. Each line has exactly 30 fields separated by #~#. Blank fields keep their place.

6. Saving and backup

Records are saved to your browser automatically and when you press SAVE. The browser can clear its data, so use **Backup & Restore** to keep a file. An encrypted backup uses a password that is never stored.

7. EPFO notice

UAN generation through the member registration module is restricted except for International Workers and citizens of Nepal and Bhutan. Other new employees should generate their UAN through face authentication in the UMANG mobile application. Registration cases must be completed within 60 days and KYC seeded must be digitally approved within 60 days. DSC/eSign is not required for verified Aadhaar.

8. Before you upload

Yes/No fields are written as Yes or No. If your EPFO office needs another form (Y/N, 1/0), change it in Settings, File format.

9. The 30 fields, in file order

#	Field	What to enter	Notes
1	UAN	12 digits, only if the member already has one	Blank for a new member. Leading zeroes are kept.
2	prvMemberId	Previous member ID	Optional, kept as text.
3	memberName	Name as per Aadhaar	Required, up to 85 characters, letters only.
4-5	DOB, DOJ	DD/MM/YYYY	Required. Joining must be after birth.
6	Gender	M, F or T	Required. Choose from the dropdown.
7-8	fatherHusbandName, relation	Name and F (father) or H (husband)	Required.
9-10	mobileNo, emailId	10-digit mobile starting 6 to 9; email	Optional. Email up to 100 characters.
11	nationality	Code from the EPFO list (India is 77)	Required. 189 codes in the dropdown.
12	epfWages	Monthly EPF wages at joining	Required, whole rupees, up to 8 characters.
13-14	qualification, maritalStatus	Dropdown codes	Marital status required (M, U, W, D).
15-19	isInternationalWorker, countryOfOrigin, passportNumber, passportValidFrom, passportValidTill	Tick International worker to see the country, passport number and dates	All required once ticked. Valid-till must be after valid-from.
20-23	isPhisicalHandicap, locomotive, hearing, visual	Tick Differently abled to choose the types	Written as Yes or No.
24-26	BankAccNo, Ifsc, NameAsPerBank	Bank details, entered in the form	Give all three or none. Account number kept as text.
27-28	PAN, NameAsPerPan	PAN such as ABCDE1234F and name on the PAN card	Optional.
29-30	AadhaarNo, NameAsPerAadhaar	12-digit Aadhaar and name as printed	Required. Tick the consent box on the form.

10. Yes and No fields

International worker, Differently abled, Locomotive, Hearing and Visual are tick boxes in the form. In the file they are written as **Yes** when ticked and **No** when not ticked. Settings, File format lets you switch to Y/N, 1/0, True/False or the portal form values.

11. Templates, samples and backups

The Templates page gives an Excel, JSON and TXT import template and a sample of 100 invented employees. Backup & Restore saves every record to a JSON file, or to a password-protected file. Restore asks whether to replace or merge, and Restore Previous Data undoes the last import, restore or delete.

12. Troubleshooting

Problem	What to do
Download TXT is greyed out	At least one chosen record has an error. Open the Validation Centre, fix it, or choose Valid records only on the Generate page.

Problem	What to do
Excel import shows few records	Records with errors are skipped by default and listed in the preview. Download the error report, correct the sheet and import again.
UAN or account number lost its leading zeroes in Excel	Format those columns as Text before typing, or use the template, which has text cells.
Data missing after a restart	The browser may have cleared site data, or you opened the tool in a private window. Restore from your latest backup.
The EPFO portal rejects the file	Check the Yes/No setting, the header line option and that the file is UTF-8. Confirm against a file your EPFO office accepted.
Wrong Aadhaar warning	The check digit does not match. Re-read the number from the card. This is a typing check only.

13. Feedback and support

Use **Feedback** in the top menu to open the Techmin feedback form in a new tab. Techmin HR Solutions, 1/676D AK Building, Marampally, Aluva, Kerala 683105. Email info@techmincsc.in, phone +91 77361 86827. Use Feedback in the top menu for suggestions or problems.

Error Codes and Resolutions

Every message that carries a code is listed with its meaning, likely cause and action. Errors stop file generation; warnings do not.

Code	Meaning	Possible cause	Action
EP-REQ	A required field is empty	The field is marked * on the EPFO form or ticked as required in Settings.	Fill the field, or untick it as required in Settings if your office does not need it.
EP-DATE	Date is not valid	The date is not a real date or is not written as DD/MM/YYYY.	Type the date as DD/MM/YYYY, for example 05/04/2026.
EP-DSEQ	Dates are in the wrong order	Date of joining is not after date of birth, or a date is in the future.	Check both dates against the documents.
EP-AGE	Age at joining looks unusual	The member would be under 14 or over 70 at joining.	Check the dates. This is a warning only.
EP-LEN	Text is too long	Name is over 85 characters or email over 100.	Shorten it as on the EPFO form.
EP-NAME	Unusual characters in a name	The name has digits or symbols.	Use letters, spaces and . ' - only.
EP-CODE	Code is not in the EPFO list	The value is not one of the EPFO codes for that field.	Choose from the dropdown. Gender M/F/T, relation F/H, marital status M/U/W/D, qualification 1,3,4,5,6,7,8,9.
EP-CONS	Fields disagree	For example salutation Mr. with gender Female, or relation Husband with gender Male.	Check the entries. This is a warning only.
EP-MOB	Mobile number is not valid	Not exactly 10 digits, or does not start with 6 to 9.	Enter 10 digits.
EP-MAIL	Email is not valid	The address is not in the form name@domain.	Correct the address.
EP-UAN	UAN is not valid	The UAN is not 12 digits.	Enter 12 digits. Keep it as text so leading zeroes stay.
EP-ID	Previous member ID has unusual characters	The ID has spaces or symbols.	Check the ID.
EP-WAGE	EPF wages are not valid	Not a number, zero, or more than 8 characters.	Enter the actual EPF wages, for example 15000.
EP-AADH	Aadhaar number is not valid	Not 12 digits, or starts with 0 or 1.	Enter the 12-digit Aadhaar number.
EP-AADHCK	Aadhaar check digit fails	A digit may be mistyped.	Re-check the number. This is a typing check only; the tool does not authenticate Aadhaar. Warning only.
EP-PAN	PAN is not valid	PAN must be 5 letters, 4 digits, 1 letter.	Correct the PAN, for example ABCDE1234F.
EP-IFSC	IFSC is not valid	IFSC must be 4 letters, the digit 0, then 6 letters or digits.	Correct the IFSC, for example SBIN0001234.
EP-ACCT	Bank account number is not valid	Not 5 to 35 letters or digits.	Correct the number.
EP-BANK	Bank details are incomplete	Account number, IFSC or account-holder name is missing.	Complete the three bank fields or clear them. Warning only.
EP-NAMEM	Names differ	Member name and name as per Aadhaar are different.	EPFO expects the Aadhaar name. Warning only.
EP-CONSENT	Aadhaar consent is not ticked	The member's consent is not recorded.	Tick the consent box after taking the member's consent. Warning only.

Code	Meaning	Possible cause	Action
EP-IW	International worker details are incomplete	Country of origin, passport number, valid-from or valid-till is blank.	Fill all four fields.
EP-PSEQ	Passport dates are not right	Valid-till is not after valid-from, or is in the past.	Check the passport.
EP-PASS	Passport number looks wrong	More than 10 characters, or fewer than 6 letters or digits.	Check the number.
EP-IWOFF	Passport details filled but International worker is not ticked	Details are filled without the box.	Tick the box or clear the details. Warning only.
EP-DA	Differently abled details do not agree	The main box and the type boxes (Locomotive, Hearing, Visual) disagree.	Tick the main box and at least one type, or clear all.
EP-DELIM	Text contains the delimiter	A field contains #~# or a line break.	Remove it; it would corrupt the file.
EP-DUP	Duplicate in this register	The same UAN or Aadhaar number is used by more than one record.	Correct or delete one of the records.
EP-DUPN	Possible duplicate person	Same name, date of birth and date of joining appear more than once.	Check and delete the extra record. Warning only.
EP-PUAN	UAN missing for previous employment	Previous employment / UAN is set to Yes but the UAN box is empty.	Enter the 12-digit UAN, or choose No if the member is new.
EP-DUPX	Already in the register	The UAN or Aadhaar number is already saved.	Skip the record or edit the existing one.
EP-GEN-001	File could not be built	A record did not have exactly 30 fields.	Reload and try again; report this with the feedback form.
EP-IMP-001	No data rows	The first sheet is empty.	Put the data on the first sheet under the headings.
EP-IMP-002	File could not be read	The file is not a valid spreadsheet.	Open it in Excel and save as .xlsx.
EP-IMP-003	Invalid JSON	The file is not valid JSON.	Check it against the JSON template.
EP-IMP-004	JSON has no members list	The file has no "members" list.	Use the structure in the template.
EP-IMP-005	No member lines in TXT	The file is empty or has no 30-field lines.	Check the file and the #~# delimiter.
EP-BKP-001	Backup is not valid JSON	The file is damaged.	Use another backup.
EP-BKP-002	Not a Techmin EPFO backup	The format is different.	Choose a backup made by this tool.
EP-DB-001	Browser cannot store data	IndexedDB is not available (private window).	Use a normal browser window.
EP-DB-002	Storage could not be opened	The browser blocked the database.	Close other tabs of the tool, reload and allow site data.
EP-DB-003	Saving failed	Storage is full or blocked.	Download a backup now and free browser storage.
EP-APP-001	Unexpected problem	A step failed.	Reload; your saved data is kept. Report it with the feedback form.

Rules and Sources

EPFO Member Registration Bulk File Generator · Version 1.0.1 · 13 November 2026 · Techmin HR Solutions

Item	Source	Status
30 fields and their order, #~# delimiter, header line, LF line ends	memberregistrationbulk.txt supplied by Techmin	Verified against the file
Field lengths (name 85, father/husband 85, mobile 10, email 100, wages 8, passport 10, Aadhaar 12), mandatory fields, dropdown codes for salutation, relation, marital status, qualification, gender	EPFO Member Registration page source supplied by Techmin (CPV 1.0.73, 11 Nov 2026)	Verified against the page
Nationality (189 codes) and Country of origin (189 codes)	The same EPFO page	Verified against the page
Aadhaar consent wording, 60-day rule, UMANG notice, DSC/eSign note	The same EPFO page	Verified
Yes/No values written in the bulk file for International worker, Differently abled, Locomotive, Hearing, Visual	Reference file shows no data rows. Techmin instructed Yes / No as the default; other conventions are in Settings	**To verify** with a file accepted by the portal. Configurable in Settings.
PAN, IFSC, bank account, name-as-per-PAN/bank columns of the bulk file	Present in the reference header and in the 30-field file; entered in the Add Member form (sections KYC)	Format checks are quality checks, not EPFO rules; written exactly in the reference column positions
Aadhaar check digit (Verhoeff)	UIDAI numbering scheme	Typing check only; no authentication

Required-field rules follow the * marks on the EPFO form and can be changed in Settings.

Release Notes

EPFO Member Registration Bulk File Generator · Version 1.0.1 · 13 November 2026 · Techmin HR Solutions

Version 1.0.1 – 13 November 2026

- Yes/No fields (International worker, Differently abled, Locomotive, Hearing, Visual) are now written as **Yes** or **No** by default. Other conventions remain in Settings.
- New Techmin HR Solutions logo.
- Section A of the Add Member form now shows the UAN and previous member ID boxes directly under Yes. The UAN is required when Yes is chosen (error EP-PUAN); choosing No clears both boxes.
- Faster start: the home page (Dashboard) appears at once, and the Excel library and guides load in the background.
- PAN and bank account details can be entered in the Add Member form and are written in their columns of the 30-field file.
- PDF user manual, error codes and release notes, feedback form, import templates and sample data added.

Version 1.0.0 – 12 November 2026

- First release.
- Add, edit, view, duplicate and delete members; search, filter, sort and page the register.
- Excel (.xlsx, .xls, .csv), JSON and EPFO 30-field TXT import with column mapping, preview, duplicate detection and an error report.
- Validation Centre with green, amber and red status for dates, Aadhaar, PAN, IFSC, mobile, email, wages, international worker, differently abled and duplicates.
- EPFO TXT generation with exactly 30 fields per member, preview and warnings before download. Excel, JSON and validation report downloads.
- Auto-save, SAVE button, JSON and encrypted backup, restore and restore-previous.
- Works offline; no employee data leaves the browser.

Known limits

- Confirm the Yes/No convention against a file your EPFO office has accepted; it can be changed in Settings.
- Previous-employment details beyond UAN and previous member ID are not modelled.
- Tested with invented data only.

Privacy

EPFO Member Registration Bulk File Generator · Version 1.0.1 · 13 November 2026 · Techmin HR Solutions

Your employee data remains on your device. Techmin HR Solutions does not receive, upload or store your employee registration information on its servers. All processing and file generation take place locally in your browser.

The tool has no login, no analytics, no tracking and no external scripts or fonts. Records are kept in this browser's local database. Aadhaar and bank numbers are masked in lists. Aadhaar numbers are never authenticated or sent anywhere. Clear all data from Settings or Backup & Restore.

The Feedback link opens a separate Google form in a new tab; nothing from the tool is sent to it.
