Techmin Income Tax Calculator for Government Employees

Release notes and user guide

Version 1.0.0 | Released 25 October 2026 | Techmin HR Solutions, a subsidiary of Techmin Wealth Partners

About this tool

The Techmin Income Tax Calculator for Government Employees works out income tax for salaried Central and State Government employees, teachers, police, railway and defence civilian staff and public sector employees for FY 2026-27 (AY 2027-28). It compares the old and new regimes, prepares relief for arrears under section 89(1), and prints the statements used in government offices. It runs in your browser and sends nothing to a server.

Web address: https://tools.complypro.co.in/govt-tax-calculator/

How to use it

1. Enter the employee details: name, designation, office, PAN, age category, employer type and place of work.
2. Enter basic pay, DA, HRA and other taxable allowances month by month. Use Copy first month to all months, then change the months that differ.
3. Add arrears, leave surrender, bonus and other income, then the deductions you can prove.
4. Enter the TDS already deducted. The result at the top updates as you type, and the balance tax is spread over the months left.
5. Save the employee, then open Statement and forms to download the documents, and Saved employees and abstract for the office-wide table.

What it calculates

- Old and new regime side by side, with age-wise old-regime slabs (2.5, 3 and 5 lakh).
- New regime slabs of 4, 8, 12, 16, 20 and 24 lakh at 0, 5, 10, 15, 20, 25 and 30 percent.
- Standard deduction of Rs 75,000 (new) and Rs 50,000 (old), family pension deduction, professional tax and the HRA exemption.
- Sections 80C group, 80CCD(1B), 80CCD(2), 80D, 80DD, 80DDB, 80U, 80E, 80EEA, 80EEB, 80G and 80TTA or 80TTB.
- Rebate under section 87A with marginal relief, surcharge with marginal relief, 4 percent cess and rounding to Rs 10 under section 288B.
- Balance tax, monthly TDS for the months left and the break-even deduction at which the old regime beats the new one.

Statement and forms

The Statement and forms tab prints three documents in the layout used in government offices, filled from the calculator:

- Anticipatory Income Tax Statement, with monthly gross salary, deductions, tax, tax already deducted and the monthly instalment to recover, rounded up to Rs 100.
- Form 16 Part B (Annexure), with the Chapter VI-A gross and deductible columns.
- Form 12BB, the declaration of claims for deduction of tax under section 192, with rent and housing loan details.

Employer name and address, TAN, deductor PAN, place, signatory, landlord and lender details are saved with each employee. Anything left blank prints as a blank line to fill in by hand.

Form 10E relief for arrears

Enter arrears in the calculator, then open the Form 10E relief tab. List each earlier year with its arrears and your taxable income for that year. The tool prepares Table A, the relief under section 89(1) and a PDF working sheet, and can carry the relief back to the calculator. Earlier-year slabs from FY 2012-13 are built in.

Things to know about the statements

- Tax is rounded to the nearest ten rupees, so a total can differ by a few rupees from a worksheet that does not round. For example, Rs 1,31,248 becomes Rs 1,31,250.
- The Anticipatory Statement has extra deduction lines (HRA, professional tax, home loan interest and Chapter VI-A) so that old regime figures add up. Form 16 Part B adds a surcharge line when surcharge applies.
- In the new regime, Form 12BB shows only the employer NPS claim.
- These are working documents prepared from your entries. They are not a certificate issued by an employer. The signature, TAN and deductor details must be completed by the person responsible for deduction of tax.

Saved employees and abstract

Save each employee in your browser, then open Saved employees and abstract for one table of salary, tax, tax paid and balance for the whole office, as CSV or PDF. Download a backup file regularly, because browser data can be lost.

What it does not do yet

- Capital gains and other special-rate income are not modelled. Enter only income taxed at slab rates.
- Set-off of house property loss on let-out property, the Agniveer scheme and some rarely used deductions are not included.
- Residents only. Non-resident rules are not applied.
- Form 16 Part B and Form 12BB merge a few lines of the printed forms; for example SLI, GIS and post office deposits are entered under the related 80C items.

Please verify

The Slabs and rules tab lists every rule and says whether it was cross-checked with secondary sources or is still unverified. Items marked unverified, such as the 80CCD(2) percentage for your employer type and the earlier-year slabs used by Form 10E, must be confirmed before you rely on the result.

Disclaimer

This calculator is provided by Techmin Wealth Partners and Techmin HR Solutions (A Subsidiary of Techmin Wealth Partners) for general information and as a planning aid only. It is not an Income Tax Department, CBDT or Government of India product, does not file returns and is not tax or legal advice. Verify every rule and result before relying on it.
