Techmin Payroll Manager

Release notes and user guide

Version 1.0.0 | Released 25 October 2026 | Techmin HR Solutions, a subsidiary of Techmin Wealth Partners

1. Purpose

Techmin Payroll Manager is a browser-based payroll workspace for accountants, payroll administrators and employers. It keeps companies, employees, salary components, attendance and monthly payroll in your own browser, calculates earnings, EPF, ESI and professional tax from effective-dated rules, and produces payslips and registers. Version 1.0.0 is the first release and covers the payroll core. Statutory upload files, arrears, exits, labour welfare fund, income tax, bonus and full and final settlement follow in later releases.

- Nothing is sent to a server. Calculations, storage, Excel, CSV and PDF files are all handled in your browser.
- Amounts are held in whole paise and rounded by explicit rules, never by loose decimal arithmetic.
- Every statutory rate, ceiling and slab is a dated, editable rule with a source and a verified mark.

2. Who it is for

- Payroll and accounts professionals who run salaries for one or more establishments.
- Employers and managers of small and medium businesses and institutions.
- Compliance consultants who prepare payroll for several clients and need clients kept apart.

3. What is in Version 1.0.0

Area	Feature
Companies	Several companies on one device, each fully separate. Name, constitution, state, PAN, TAN, EPFO and ESIC numbers, PT and LWF registration, branches, wage days basis, payslip settings and logo.
Employees	Full employee master with employment, statutory and bank details, search, sorting, paging, masked identifiers, custom fields, document collection with verification status, Excel or CSV import with a preview and row-level errors, duplicate detection, and export.
Salary components	Unlimited earnings and deductions. Methods: fixed, percentage of another component, formula, balance of gross and manual monthly input. Separate statutory mappings for EPF, ESI, professional tax, tax, bonus and gratuity. Effective dates, rounding and proration choices.
Formula builder	A safe formula language with fixed fields and functions. No program code is ever run. Formulas are checked as you type, and circular references are caught.
Salary templates	Templates by employee group, a live preview of earnings and employer cost, copy, bulk assignment of a template, gross and effective date to many employees, per-employee overrides and salary history.
Attendance and inputs	Monthly grid for loss of pay days, overtime hours and every manual component, with Excel or CSV import into the grid for review before saving. Joiners and leavers part-way through a month are prorated.
Payroll run	Calculation for a month with draft, reviewed, approved and locked states. Approved payroll cannot be recalculated. An immutable snapshot of results and of the rules used is saved with each run. Exceptions are listed for each employee.

Area	Feature
Statutory calculation	EPF (employee, EPS, employer EPF, EDLI, admin) with the 17 September 2026 ceiling change handled by day-wise split; ESI with the daily wage exemption and upward rounding; professional tax by state rule; gratuity estimate; the optional 50 per cent wages test.
Reports	Monthly and year-to-date salary registers, earnings and deductions summary, employer contribution register, professional tax register, variance report, attendance register, gratuity estimate, exceptions report and joining and exit report, each as PDF, Excel or CSV.
Payslips	Printable PDF payslips, one employee or all, with current-month and year-to-date columns, optional employer contributions and the gratuity display setting (none, total, accrual or both) with a clear note that it is not a deduction.
Rule master	Effective-dated rules for EPF, ESI, gratuity and professional tax with sources, verification marks, version history and overlap checks. Professional tax rules for any state can be added.
Backup and audit	Backup to a JSON file with an integrity check, optional AES-256-GCM password encryption, restore with checks, and an audit history of actions on the device.

4. How to use it

1. Company: create your company. This also loads default salary components, a sample template and the statutory rules.
2. Rule master: open each rule marked unverified, compare it with the official notification and tick Verified once confirmed. Add a professional tax rule for any state other than Kerala.
3. Salary components and templates: adjust the components and build a template for each group of employees.
4. Employees: add or import employees, then assign a template, gross salary and effective date. Use the selection boxes to assign many at once.
5. Attendance and inputs: pick the month, enter loss of pay days, overtime and manual items, then save.
6. Payroll run: calculate, read the exceptions, open each employee for the full working, mark as reviewed, approve and lock.
7. Reports and payslips: produce registers and payslips from the saved payroll.
8. Data and backup: download a backup after each month. Add a password if the file will be stored or sent anywhere.

5. How the main figures are worked out

- Salary: each recurring earning is calculated for a full month and then prorated by paid days divided by the days basis. Overtime and manual items are not prorated.
- EPF: employee 12 per cent of EPF wages; employer EPS 8.33 per cent of pension wages (nil from the age you set, 58 by default); employer EPF is 12 per cent less EPS. EDLI and admin charges are shown separately. Amounts are rounded to the nearest rupee.
- EPF ceiling change: the wage ceiling rose from Rs. 15,000 to Rs. 25,000 on 17 September 2026. When a rule changes inside a month, wages are taken for each part of the month at that part's ceiling, weighted by days. This follows EPFO's September 2026 illustration as reported. Check the latest EPFO instruction.
- ESI: employee 0.75 per cent and employer 3.25 per cent of ESI wages, each rounded up to the next rupee. Where average daily wages are Rs. 176 or less the employee share is nil and the employer share remains.
- Professional tax: the state rule gives slabs on monthly, half-yearly or yearly gross and the months of deduction. Half-yearly rules sum the saved months of the period and warn if earlier months are not saved.
- Gratuity estimate: wages for gratuity multiplied by 15, divided by 26, multiplied by counted years (a part year over six months counts as a year), subject to the limit in the rule. It is an estimate, not an accounting provision or an actuarial valuation.
- Year to date: the sum of saved approved or locked months in the financial year (1 April to 31 March), plus any opening balance entered on the employee, plus the month being viewed.

6. Rules and their verification status

Rule	Status and source
EPF up to 16 Sep 2026	Ceiling Rs. 15,000. Rates 12, 8.33, 0.5 and 0.5 per cent. Checked against the EPFO ECR 2.0 document.
EPF from 17 Sep 2026	Ceiling Rs. 25,000 per the Ministry of Labour and Employment notification of 17 September 2026 (reported as S.O. 5109(E)). Marked unverified because it was confirmed from published reports. EPS and EDLI ceilings are assumed to follow it. Confirm on epfindia.gov.in.
ESI	Rates 0.75 and 3.25 per cent and the Rs. 176 exemption are on the ESIC contribution page. The Rs. 21,000 ceiling comes from secondary sources. Marked unverified.
Gratuity	15 days per year, divisor 26, limit Rs. 20 lakh and five-year eligibility as described in the Ministry of Labour and Employment FAQs on the labour codes.
Kerala professional tax	Half-yearly slabs deducted in September and March, taken from published payroll references. Marked unverified: confirm on the official Kerala profession tax portal. No other state is preloaded.

7. Data, privacy and backup

- Records are kept in the IndexedDB storage of your browser. Nothing is transmitted to Techmin or any other server by the software.
- Browsers can lose this data if you clear site data, use a private window, change profile or lose the device. Download a backup regularly.
- A backup password encrypts the file with AES-256-GCM using a key derived from the password. Techmin cannot recover a lost password.
- Uploaded employee documents stay in the browser and are not included in the JSON backup. Keep the originals.
- Identifiers (PAN, UAN, IP number and bank account) are masked on screen and in reports and payslips unless you tick the box to show full numbers.
- Use trusted devices only. A browser has no server-side login, so anyone who can open this browser profile can open the data.

8. Known limitations and what comes next

- This release does not produce the EPFO ECR file or the ESIC contribution upload file. The separate PF ECR File Creator and ESIC Monthly Contribution Creator on the same site do that from a sheet.
- Not yet included: EPF arrears, EPF and ESI exit workflows, labour welfare fund, income tax and salary TDS (enter TDS manually for now), Form 16, statutory bonus, full and final settlement, leave policies and holiday calendars.
- ESI contribution periods and the continued-coverage rule are not modelled. Wages above the ceiling raise a warning only.
- The EDLI admin charge is held at zero and the minimum administrative charge per establishment is not applied. Confirm both.
- Excel (.xlsx) reading and writing use a library loaded from the internet the first time. CSV works without it. The Excel paths were not exercised in the automated tests for this release.
- Professional tax uses the saved months for half-yearly slabs. Where earlier months are not saved, a warning appears and the slab is applied to the months available.
- The tool does not file returns or connect to any government portal, and its output is not an official certificate or return.

9. Version history

Version	Date	Summary
1.0.0	25 October 2026	First release: companies, employees, salary components and templates, attendance, payroll run with status control, EPF, ESI, professional tax and gratuity estimate, registers, payslips, rule master, encrypted backup and audit history.

10. Disclaimer

Techmin Payroll Manager is provided by Techmin Wealth Partners and Techmin HR Solutions (A Subsidiary of Techmin Wealth Partners) ("Techmin") for general information and as a working aid only.

- Not advice: the software and these notes are not legal, tax, accounting, actuarial or financial advice and do not create a professional relationship.
- Your data and current law: results depend on the data, rules, ceilings and slabs entered or edited by the user. Acts, rules, notifications and EPFO or ESIC instructions change, and default values may be out of date or unsuited to your establishment.
- Verification: confirm every rule against the official source before relying on it, and review each payroll before approval. Rules marked unverified are provided only as a starting point.
- No warranty and limitation of liability: the software is provided "as is". To the fullest extent permitted by law, Techmin and its directors, employees and affiliates are not liable for any loss, penalty, interest or damages arising from use of, or reliance on, the software or these notes.
- User responsibility: you are responsible for the accuracy of the data you enter, for the security of the device and backups, and for statutory filings and payments.
